THE LAND.

Orchard, Farm, Garden, Rancho and Stockyard.

[A. W. JEFFREY, AGRICULTURAL EDITOR.]

NOTES AFIELD.

Year Book 1901.

THOSE farmers who really want it the new annual should apply for it at once. Arrangements have been made by the Horticultural Commission for securing a large number of these year books, distribution, and out of the order of the applications. Last year 150 copies were distributed from a list of those who thought enough of the work to send in their names. This arrangement does not interfere with those who have been getting their annuals direct from their representatives. I hope our plan will not fail this year, as the book is of particular value.

A Famous Flower.

What would be more enjoyable than to go afiel to find the Matilija poppy, one of the most wonderful of the flowers of this Coast. I have now in my possession a great bunch of these beauties, and they present with their large snow-white petals and center of lemon yellow stamens. This flower has a delightful odor, resembling, when not too close, that of the lily of the valley. The Matilija poppy must be in full bloom in its most noted haunt in Ventura county, or those scarcely less celebrated in Riverside county.

Something New.

Olive growers will be pleased to know that a thorough test is to be made of the new South African parasite of the black scale, said to keep this king of pests in complete subjugation about Cape Town. W. E. Hughes, receiving the assignment of this insect from Alexander Cope, the State entomologist, and will set aside a large block of olive trees in his orchard this side of Howard Summit, or the whole orchard, if necessary. Mr. Hughes' agrees to liberate the bugs and keep out the sprayer and fumigator until the best is made. Mr. Craw has not yet sent down a large colony of these scale eaters, but promises to follow with a new lot as often as necessary. It is good to know for the State quarantine officer's annual visit to Southern California, and the horticulturists are preparing to give him a warm welcome. It is hoped the Hughes experiment will demonstrate that there is a parasite adapted to our climate, and of sufficient fecundity to populate the orchards and exterminate the black pests.

Fight to the Finish.

The San Francisco and Sacramento press is full of the fight between the commission men of the greater city and the fruit growers of the Sacramento valley. The latter have been dissatisfied for some seasons at the treatment they allege to be unfair. To make matters worse, the commissioners raise the rates on the grower this season. The growers have organized, rented a large saleroom in San Francisco, applied for membership in the city organization to which the commission men belong, promising to abide by all the local rules for selling fruit, and expected to open up business without friction or delay. Not so, however, for the growers were denied membership and are now being boycotted, refused when purchasing good grapes to be sent to the commission dealers. It will now be in order for the latter to employ sandwich men to parade in front of the fruit growers' store, declaring the farmers "unfair" and advising honest people to have nothing to do with the new business. Sanborn, Vail & Co. have had to endure one of these sandwiches parading the length of their frontage for eighteen months. He has a trail work in the curbing, and hasn't broken up the trade of the firm in all these weary days of tramping.

A New Invasion.

I learn from Frank Scoville of Corona that the black scale is becoming a serious pest to the groves of Corona, and from another source that the horticultural commissioners of Riverside county are alarmed at the invasion and are preparing to meet it all along the line. It has been held that from the dryness of the air and the warm weather this scale could get a serious hold upon the oranges to follow the foliage of the fruit trees, or if they do not supercede, indifferent are they to the ravages of the different fungous pests that destroy them. The quality of this year's crop of fruit and the quantity and quality of fruit and leaf buds for next year depend upon the ability of the leaves to elaborate the crude material sent up by the root system, and furthermore without leaf action there can be no root action; the leaves are to the tree what the lungs and heart are to the body. We must do the greatest and most complete development of root, branch and fruit, we must religiously preserve the foliage. The damage done to the foliage of the deciduous fruit trees in this county is with probably one exception (the pear slug) due to the workings of the various parasitic fungi, different in name and method of growth, but all alike in the primal germ (the spore), and all combat by the same method and destroyed by the same method. Bordeaux mixture ready for use will cost in small quantities one cent a gallon, and the deciduous-fruit grower perhaps could not plan out a more profitable course of study for the coming summer than a series of experiments covering the preparing, applying and keeping a record of the results of this standard fungicide.

Greeley Couldn't Read It.

It is not often one can pick up a new joke on a great man. I was fortunate in that respect last Wednesday. In the early days, L. J. Stengel, now a florist on the East Side, was in the service of Peter Henderson at New York. Horace Greeley had written a letter to Henderson, asking for a man to look at some plants owned by the editor of the Tribune. Stengel was detailed to attend to it, and, armed with the letter, Stengel went to the office of Greeley, bearing, also, a brief note from Henderson, which read: "On presenting the note to Greeley, he remarked: 'Go where with me?' It might land you in h---l, young man! I haven't asked you to go anywhere with me." Stengel, very much embarrassed, handed him the letter written

destroy the infection. Why not let those who can spare the time and money to experiment with new insecticides and appliances prove the efficacy of remedies before sacrificing an orchard to a crop at best, by 'projection' with doses of different kinds and their manner of combination? The loss from experimentation has been frightful during the last year, and in no case has a general use of distillate been justifiable, except at Riveria, where the trees are so large and so interlocked that no other remedy is possible. At Riveria, even, the cyanide treatment will be used largely the coming campaign.

Hoppers at Warner's.

The following interesting item, taken from the San Diego Tribune, describes the methods of fighting locusts at Warner's ranch. Our Prof. Woodworth, who has been called north to engage in a similar warfare at Fresno and other places, has no Indians with which to stay the invasion. This is the Indian method:

"For two weeks grasshoppers have been hatching very fast. They infest this valley every spring. Mr. Taylor, the superintendent of the ranch, has for ten days had a army of men fighting the as yet wingless pests. With sacks or brush they drive them into ditches, already prepared, where they sack them and carry them to another with burning straw, where they are cremated."

The grasshoppers start in on one side of the ranch and the destroyers start at the same place and keep pace with them. In that way Mr. Taylor saves most of the grass."

Late Census Bulletin.

The Times has just received the census bulletin relating to agriculture in California. "Farm," as defined by the Twelfth Census, includes land under one management, used for raising crops and pasturing live stock, with the wood lots, swamps, meadows, etc., connected therewith. It includes also the house in which the farmer resides, and all other buildings used by him in connection with his farming operations. From these records the following interesting statistics are taken:

Number of farms in California.....	73,543
Value of farms, including improvements.....	\$707,956,796
Value of land, other improvements.....	77,488,000
Value of improvements and machinery.....	\$8,444,360
Value of live stock.....	\$2,212,719

By adding the last two items to the value of "farms" it gives the total value of the farm property, \$786,527,955.

The products derived from domestic animals, pasture and bees, including land and buildings, are not included on farms, are referred to by this bulletin as "animal products." The total value of all such products, together with the value of all crops, is termed "total value of farm products." This value for 1899 was \$13,990,696, of which amount \$35,324,394, or 27.6 per cent, represents the value of animal products, and \$86,365,12, or 72.4 per cent, the value of crops, including the total products on all farms. The total value of farm products for 1899 exceeds that reported for 1889 by \$44,631, or \$1.8 per cent.

The value of "farm products," or the value of farm "income," is obtained by deducting from the total value of farm products the value of the products fed to live stock on the farms of the producer. In 1899 the reported value of farm products was \$13,488,000, leaving \$13,202,056 as the gross farm income.

The percentage which this latter amount is of the "total value of farm property" is referred to in the text as the "percentage of gross income upon investment," for California in 1899 it was 14.8 per cent.

Grasshoppers Galore.

A letter just received from Prof. C. W. Woodworth states that he had been temporarily recalled from his investigation of the red spider and detailed to investigate the locust plague at Fresno. Many acres of vines had been denuded of fruit and verdure and the visitation was becoming serious. The professor says he will be detailled several days in that field, studying the origin and characteristics of the attack.

Word has been received from portions of San Diego county that this pest is very destructive, especially upon the verdure of the damp lands of Warner's Ranch. Some weeks ago an item was published in this department in which the prediction was made by a representative of the lessors on the ranch, that the "hoppers" would be numerous. Ordinarily this insect appears there in such small numbers as to do little harm, or subject to control by burning straw over the hatching grounds of the "hoppers," but this season such remedies are ineffective, though supplemented by employing the Indian woman to gather the insects into sacks in the cool part of the day and burning them en masse.

THE POULTRY YARD.

Poultry That Paid.

The Hanford Sentinel tells of an egg ranch, the property of W. C. McFarlane started in the poultry business a few years ago. He has a large number of hens and a disposition to stay with the business. He now has a brooder 22x4 feet, with 1000 bright Leghorn chicks. It has sixteen yards and the temperature is maintained at 90 degrees for the little fowls down to 45 degrees for the older ones. Pounds of chicks amount to no more than 5 per cent. "When the chickens are ready to leave the brooder," says the Sentinel, "they are turned out into the pens, of which there are four, each containing a little house, a yard and a third of an acre each, and six smaller yards. Half of these yards are sown to alfalfa and the other half is laid out in the peach orchard. Water is supplied every yard out of the peach orchard by means of automatic waterers, so that the chickens have pure and fresh water all the time. There are no puddles or mud holes.

Mr. McFarlane has refused \$5000 for his egg farm with stock and appurtenances. He now has 2200 chickens, big and little on hand, of which 700 are laying hens.

Pheasants.

By the efforts of some who call themselves or like to hear other people call them sportsmen the pheasant has been introduced in this country. It is claimed as no other country, that there were found in England before the country was invaded by the Romans, and much reason to think they were much earlier known, domesticated and bred in Asia before that date. Possibly they were known in Asia and the guinea fowl, though many would claim the turkey as a native of North America, without any evidence.

These are some of the prime causes for the high prices of meats. The other prime causes are the cost of living, which is the reason why we have to pay so much for our meats. While beef will be cheaper when the grass-fed cattle are in marketable shape, this cause will not appear to affect the price of the products of the hog, as that animal cannot fatten on grass.

There are plenty of grass cattle in the country. Corn is high and farmers have been giving it to their cattle at double the ordinary price—namely, 50 to 60 cents a bushel. They sent South and cottonseed oil so as to help top it off.

"One gallon of wine extract yields you 100 gallons blending wine, alcohol free. You have to take a barrel of 100 gallons of water, pour in one gallon wine extract and fill the barrel with water, shake the barrel well, and in a few minutes you will have a clear and bright wine, which will never turn cloudy or change color. At 10 cents a gallon in this way the blending wine will cost only 10 cents a gallon." Such are some of the statements in confidential letters being sent out to California dealers by the French Wine Extract Manufacturing Company, which has offices in the Emma Spreckels building, with F. C. Kauders as chief representative and manager for the United States.

This concern goes on further to promise in its letters: "We wish to inform you that we have established our business in the United States and the attention will be given to further the interest of our customers on all matters. We conduct our business very discreetly, so the general or firm name of the customer is not mentioned in the statements, and the successful operation of the enterprise naturally contemplates an evasion of the revenue laws."

More than the violation of postal and revenue laws is the intended damage to California's wine industry. Now that the vineyard product of this State is attaining a wide reputation and the market is being bought up, the packers, through their concern secretly, are planning to undermine the integrity of California winemakers and offers them some cheap substitute for the real wine, which has begun to be one of California's greatest income producers.

[Chronicle.]

THE SUGAR BEET.

A Bluff Called.

Ex-Gov. John Lind of Minnesota would have done well to look before he leaped, when he said: "If you will show me two beet-sugar farmers who are not making a profit, I will be satisfied." The packers of the Minnesota Sugar Company have turned out \$100,000,000 worth of sugar in 100 tons of beets daily, and turned out 6,000,000 pounds of refined sugar in the last campaign, and sugar was sold at good figures, and the surplus was devoted to the improvement of the plant. There were 150 farmers cultivating 2000 acres of beet land, and they received from \$50 to \$80 per acre, leaving them a net profit of \$30 to \$50 per acre. The statement of one farmer that "sugar is wheat" is perfectly true, and should be heeded by those whose wheat land is worn out. Beets will grow on same land and produce splendid results. The above-named farmer furnished its farmers with 250 tons of sugar at retail prices. This sugar was used for cattle food, and produced a higher quality of milk, cream and butter than any other farm and commercial food did, and will command a goodly sum formerly spent for extra supplies of other stock food.

The wide-awake Minnesota farmer will know a good thing when he sees it. If he follows the example of his neighbor, he will be well off. We will soon have to look for objects of charity outside of Minnesota. We would take the liberty to advise the Governor to spend his spare money in getting a little more information on the beet-sugar business.

Doctor Harrison,

SPECIALIST FOR MEN

Seventeen Years a

WEAKNESS AND BUSINESS.

Any man who can give us good, reliable business reference can get us our bill cured before paying for treatment, or we will arrange for payment in advance as his case shows actual benefit. We propose to give value received to our

allowing payment at any time.

Weakness Plainly Described.

The patient says: "I have a WEAKNESS and I have called to examine the cause and cure." His next question is, "Do you make an examination for certain diseases?" The doctor replies: "Yes, I do, and I have examined thousands of cases in all their various conditions, and I have found many who are obliged to call unfavorable and some unfavorable ones. The fact is, the weakness is a symptom of disease, and I have examined for this disease for a long time. It is nearly always chronic before the patient has any reason to suspect it, and it comes to us only after the vital energy begins to fail." We will take the liberty to advise the Governor to spend his spare money in getting a little more information on the beet-sugar business.

THE TIMES ILLUSTRATED

San Bernardino and Riverside Counties--News of Their Towns.

[NEWS REPORTS FROM TIMES CORRESPONDENTS.]

POOR PERRIS RANCHERS
WILL LOSE LAND.JUDGE WELLBORN'S DECISION OF
FAR-REACHING EFFECT.Many Farmers Will be Unable to Pay
Assessments and Property Will Revert to Bondholders--Werts Jury Disagreed--Riverside Brevities.

RIVERSIDE, June 12.—The decision rendered yesterday by Judge Wellborn of the United States Circuit Court in Los Angeles issuing a pre-emptory writ of mandate to compel the Supervisors of Riverside county to make an assessment upon the Perris Irrigation Company to pay \$5308.75 is of importance to owners of land in the Perris Valley, whose lands were bonded when the Perris Irrigation District was formed. Judgment in the sum named was rendered in the Superior Court, March 28, 1901, in favor of R. H. Thompson. The Supervisors demurred in making the levy, and the decision rendered yesterday was in reality. For years the district had been unable to interest in its bonds. In 1901 R. H. Thompson, one of the bondholders, brought suit against the district and obtained judgment for the amount due for interest on bond coupons held by him. The trustees of the district failed to levy an assessment to pay the amount. This put the matter up to the Supervisors, who refused to act on several grounds. Mandamus proceedings were then instituted in Judge Wellborn's court. As a result of the decision many of the farmers will be unable to pay the tax and the land will revert to the bondholders. Other innocent purchasers of bonds will probably sue the district to recover unpaid interest, and the effect of the decision will probably be far-reaching.

RIVERSIDE BREVITIES.

After being out all day the jury in the case of the people against a man named Werts, charged with criminally assaulting a weak-minded woman, a widow, and then robbing her, returned a verdict, and was discharged. Nine stood for conviction and three for acquittal. The case was returned to the trial calendar. Werts is out on bail.

In the great tournament for the championship of Riverside for the third consecutive year the champion was held

yesterday on the Rubidoux line between Hays and Whipple resulted in a victory for Hays, 3 up and 2 to play, with the Redlands delegation winning the glorious Fourth; a sever was ordered for Owens, Olive and Grant streets;

the report on the question as to whether the smoke of the gas plant is a nuisance was made, but was incomplete and the committee was con-

tinued; additional electric lights were ordered for Grant streets, and the question of closing tunnels at mid-

night was also thoroughly discussed.

Redlands Woodmen of the World will turn out two hundred strong for the big demonstration at San Bernardino next Saturday. It promises to be the biggest thing of the kind ever attempted in this neck of the woods. The Redlands delegation will have second

place in the street pageant.

Mrs. Bessie Shepherd is inviting bids for the erection of a handsome three-story business block at the corner of West State and Fourth streets. It is to be of good proportions and will be one of the finest structures in the city. It has already been leased.

The Redlands Prohibitionists held

a meeting of the County Executive Committed a short time ago. It was

decided to call a mass convention for the purpose of nominating an independent ticket.

Robert Currier of Chicago, well known in Los Angeles, died yesterday at the home of H. D. Moore, in West Redlands. He was 30 years of age and came here for his health last fall. Mrs. Currier arrived yesterday, just in time to see her son before he died.

Particulars of his death were not

available.

Miss Anna Rice tendered a surprise

party yesterday afternoon and even-

ing to her parents, Mr. and Mrs. C. F.

rice, on the occasion of their twenty-

fifth wedding anniversary.

William Barker pleaded not guilty

in the Superior Court yesterday on a

charge of selling liquor to Indians. The

trial was set for June 23, and a venire

of twenty-five ordered.

Mrs. S. H. Herrick, assisted by her

daughter, Mrs. J. Lansing Lane of

Orange County Towns: Santa Ana and Fullerton.

FULLERTON.

LOCAL NEWS NOTES.

FULTON, June 12.—J. S. Tipon,

who went to India to assist in

moving the cantaloupe crop controlled

by the associations, writes that ship-

ments will not begin until June 15, as

C. G. Carlson of Los Angeles, and H.

H. Hale of Placentia, report that they

will have nearly a full crop of walnuts

this season, in their Fullerton or-

chards, notwithstanding that it has

been stated that there will be a short-

age of 25 per cent. in the Fullerton

walnut district. They also report their

grounds are free from the black speck.

Contable Pendergraft has received

a check for \$2,000 from the Sheriff of

Daviess county, Mo., for his services

in arresting and holding Joseph Wil-

liams here, charged with incest in

Missouri.

The city waterworks has purchased

two lots adjoining its property.

Knowlton has been appointed a registration clerk for Fullerton pre-

cinct.

L. M. Small and son left this week for Bakersfield.

Roger Farias, who has been here

some time, returned yesterday to his

home at the Palms.

The graduating class of the High

School will give a class night entertain-

ment at Bank Hall tomorrow night.

M. Bollesano has sold 1000 sheep

to the Cudahy Packing Company at

Los Angeles at \$5 per head.

SANTA ANA RACE TRACK.

It is now apparently assured that

the Santa Ana race track will be

maintained as a speed course. Several

months ago George W. Ford

had a considerable sum of money

invested in the track.

It is the intention of the present

owner, as he considers it superior to

any other track in Southern California

for training purposes. Mr. Ford has

a considerable stock of young horses,

which he is continually introducing to

the track.

Hay's Hair-Hea

EVANSTON, Ill., June 12.—
GENTLEMEN—Received your
Health and Harlan Soap and am
pleased with it. It is an excellent
and keeps the hair soft and glossy.
bought some at the drug store and
not to be without it. There are three
family using it. We are very pleased
and sorry we did not before
truly, JENNIE JOHN

Large No. Bottles. At Leading Drug

should be placarded conspicuously
if found necessary, guards should
be armed and detention and medical
hospital created in the county, of
which measures, together with
general disinfection, publicity should
be courted rather than avoided.

Ninth. We further advise
whichever the responsibility may be
the public health rests solely with
the Board of Health, and that no other
high should thrust itself between
them and their duties, and where
any questions of interest arise
the discharge of said duties
should be made amenable to the
law.

Lastly, we call upon sanitary
associations, boards of health, and
other health associations through
the country to join with us.

The above expression was fully
counsel and finally adopted unanimously
by the conference.

The following gentlemen from
various parts of the country and
representatives of health officers
Byron D. Stanton, president, and
Charles O. Probst, secretary, of
Ohio State Board of Health; Dr.
William Bailey, president, and Dr.
N. M. McLaughlin, vice-president, of
State Board of Health. All these
gentlemen formally concurred in
the above action in regard to
the San Francisco.

when a wagon, from which
Washington was destroyed, ran
over them, and news of the accident
was telegraphed to the city.

CLAIM NOT GOOD IN LAW

LONDON, June 12.—The claim
of the London and Globe
against the London and
Globe, resulted today in a verdict
in favor of the defendants. It
is decided that the defendant
should not receive £1,000,000
from the corporation. The
defendant's difficulties
and the agreement to be carried
out by the London and Globe would not
have been a sufficient cause for
the claim.

NOMINATED FOR CONGRESS

Burn Hoppers.

THE NEW ASSOCIATED PRESS—P.M.

PORTLAND (Or.) June 12.—The
posse of three counties is aroused
in the highest pitch over the daring
act for liberty of Harry Tracy and
Doris Merrill, the convicts who
escaped from the Oregon penitentiary
yesterday after shooting to death
two guards and one convict. They
have been hunted with bloodhounds
for two days by a posse of nearly two
hundred armed men, they have been
shot at a dozen times, and tonight
they are still at large. Their daring
acts have terrorized the inhabitants
of the country through which they have
passed, and every demand of the
responsible farmers. They have eaten
at least two meals a day since their
flight, and upon entering a
household their hold-up announcement
that they are the fugitive convicts
has compelled the fugitives to surround
a stretch of woods, and
John D. Parkin, leader of the posse,
believed that there was no chance of
escape, the pickets being only 150
yards apart, the men covering
the line in the darkness
of early morning. At 2 o'clock
this morning Charles Tup, one of the
guards, decided to move back to a
more comfortable place, and as he
was moving had scarcely taken up his
station when one of the convicts
climbed over the fence at the exact
spot Tup had left. Tup was armed
with a shotgun loaded with buckshot.
He fired at the outlaw four times,
but missed.

The petition asserts that it is the
intention of the posse to "lay
the world to waste" and to
operate a submarine cable between San
Francisco, Honolulu and Manila, and
that the enterprise will be ready for
operation during the month of November.
The next day the fugitives will be
arrested, and this evening it is
supposed they are in the
woods near Deep Creek, about seven
miles from Woodburn, close to the
border between Marion and Clackamas
counties.

While this was happening the other
a convict climbed over the fence at a
point 100 yards or more away. The
two fugitives ran rapidly to their
hiding place, and proceeded on their
way together. No one attempted to
follow until daylight, and the next
morning the fugitives were at
a house at a farmhouse near
Modoc, a distance of about five
miles distant when they took
breakfast. When daylight came Sheriff
Dowler and posse set out for Monitor,
followed closely by the two companies
of militia.

At 12:30 o'clock this afternoon the
fugitives landed at a farmhouse
near Monitor, and they secured six
horses and a team and a frying pan,
which they took with them. The
Sheriff of Clackamas county
today organized a posse and joined in
the search. Co. A, Oregon National
Guard, of Oregon City was called
out late this afternoon by Gov.
to take up the chase after the
fugitives. They have been tracked all
day, and this evening it is
supposed they are in the
woods near Deep Creek, about seven
miles from Woodburn, close to the
border between Marion and Clackamas
counties.

Chief Duhon turned the
leadership of the posse over to Sheriff Cooke
of Clackamas county tonight, and
rejoined to Aurora. Guard Carlson of
Walla Walla in charge of the bloodhounds,
had brought the dogs in to
night for a rest.

Three companies of militia are
guarding the roads tonight, though the
explanation of the fugitives is not
known.

HEAVIEST MAN IN WORLD.

BY THE NEW ASSOCIATED PRESS—A.M.

SAN FRANCISCO, June 12.—Henri
Maurice Canon, the heaviest man in
the world, died suddenly today in this
city. He was born in Zurich, Switzerland,
fifty-two years ago, and developed
into a heavyweight athlete.
Wrestling was his specialty, and he
was also a favorite of weights.
About ten years ago he began to
stout, and at the time of his death
weighed 613 pounds. His actual dimensions
were as follows: Height, 5ft.
4 1/2 in.; circumference of waist, 97 in.;
circumference of chest, 54 in.; weight, 300 lb.

The deceased was a member of the
San Francisco Schuetzen Verein, which
society will bury him. Heart disease
was the cause of death.

WASHINGTON.

(CONTINUED FROM FIRST PAGE)

Committee, will attack it. Representative Dalzell of Pennsylvania and Representative Payne of New York, two important House leaders, will oppose the bill. This opposition will draw some Republican support from the bill, so much depends upon what the Democrats do upon the final vote.

Representative Newlands of Nevada, who in good measure controls the Democratic vote, says he believes a large majority of Democrats will vote for the bill, and he bases this opinion upon a canvass that he made some time ago. There are, without doubt, enough votes pledged on both sides of the House to pass the bill, if these votes will all stay pledged. Republican supporters of the bill are doubtful whether the Republican votes pledged to the bill can be held in line with opposition from so many important leaders.

At the outset of the present debate there are pledged to the bill some 310 votes, which is about twenty more than would be absolutely required to secure its passage. That number has fallen off slightly since, so now there is probably a bare majority for the bill, and everything will depend upon the strength that Messrs. Cannon, Payne, Dalzell and Ray can muster in the final hours of the debate.

RE-SURVEY OF IMPERIAL.

[BY DIRECT WIRE TO THE TIMES.]

WASHINGTON, June 12.—[Exclusive Dispatch.] Senator Bard today introduced a bill authorizing the Interior Department to make an entire new survey of that part of San Diego county known as the Imperial country.

SENATE AND HOUSE.

PROCEEDINGS IN BRIEF.

BY THE NEW ASSOCIATED PRESS—P.M.

WASHINGTON, June 12.—After con-

sidering the Land-Use Dodge Canal

Bill for an hour and a half today with-

out completing it, the Senate resumed

consideration of the Isthmian canal

question. Mr. Morgan of Alabama oc-

cupied the floor for three hours and a

half, discussing particularly the diplo-

matic phases of the question. From

this point, was diverted by an

amendment introduced by Mr. Fair-

banks of Indiana, providing for the

issue of bonds for the construction of

the canal.

Mr. Morgan vigorously attacked the amendment, maintaining the expense of the canal's taxation would be paid out of the treasury's current receipts. Incidentally, Mr. Morgan again op-

posed the report of the new Panama Canal Company to dispose of the concessions held from the old company.

The House today adopted an impor-

tant part of the construction of the

irrigation bill, which passed the Sen-

ate some time ago, and devoted the

day to general debate on the measure.

Tomorrow the bill will be read for

amendment, and the five-minute rule.

Mr. Mondel (Wyoming), Tongue

(Oregon), Terrell (Massachusetts), and

Shallenberger (Nebraska), spoke today

in favor of the bill. Mr. Ray, chair-

man of the Judiciary Committee, made

a long legal argument against it. Mr.

Olmstead of Pennsylvania enlivened the

proceedings with a humorous speech

on to Mr. Cushman's recent attack

on the Committee on Rules.

FIFTY-SVENTH CONGRESS.

REGULAR SESSION.

BY THE NEW ASSOCIATED PRESS—A.M.

WASHINGTON, June 12.—SENATE.

At the conclusion of routine in the

Senate today, a resolution introduced

by Mr. Carnack of Tennessee, direct-

ing the Senate to adjourn, was adopted

to the War Department to investigate the

discharge from the War Department of

Miss Rebecca J. Taylor, a clerk in that

department, was called up. On motion of Mr. Platt of Connecticut the resolu-

tion was referred to the Committee on

Civil Service.

The resolution was introduced yesterday

by Mr. Culbertson of Texas, directing

the Secretary of War to send to the

Senate an itemized statement of the

expenditures made from the Cuban

funds from the time of the American

occupation to May 1 of this year, was

taken up.

Mr. Platt of Connecticut explained

that the information was being com-

piled in the War Department, and the

resolution was referred to the War

Department.

The discussion continued until 2

o'clock, Mr. Platt confessing that he

was "more and more getting into con-

fidence about that matter."

On the part of the Isthmian Canal

project was then resumed, and Mr.

Hearst formally offered his amendment,

of which he gave notice some time ago

in the form of a substitute. The amend-

ment was understood to bind the

President to cause an Isthmian canal

to be built by such route as he

may select; that he shall obtain all

advice possible, and that \$10,000,000

be appropriated to the work.

Mr. Morgan, in charge of the pending

bill, is taking the floor and noting the

absence of a large majority of the Sen-

ators, said it mattered not to him

what his remarks or his

remarks or not, as he was addressing his

the American people, in order that the

facts concerning the canal question

might be well understood. The few

expressions in some quarters

that an increase in the irrigated area

will disastrously affect the values of

farms in the Middle West, was clearly

stated by the Isthmian Canal

and the diplomatic associa-

tions between those two govern-

ments and the United States looking

to the canal's construction.

MR. MORGAN'S STRUCTURES.

BY THE NEW ASSOCIATED PRESS—P.M.

WASHINGTON, June 12.—After dis-

cussing the diplomatic nomination of

Alabama Senator intimated that Min-

ister Silva of Colombia had been re-

called from Washington "because the

Colombian government could raise no

money on his opinion," which was not

in accordance with the views of Co-

lombia as to the canal question. He

said that Colombia if the United

States should give \$40,000,000 for the

Panama Canal, would give \$10,000,000

down, "and how many millions more

God only knows—or his Satanic maj-

esty—who I think, has more to do

with that than the Almighty."

He said the Liberal party in Colom-

bia never would extend the conces-

sions of the new Panama Company,

and if the United States would pay

\$40,000,000 for these concessions and the

protection it might as well throw the

money into the sea.

He declared that there never was a

"more mistaken piece of legislation

than the Spooner amendment, and re-

ferred to it as having been "offered

in the name of the Senator from Wis-

consin."

Mr. Spooner warmly resented the

intimation that he was not the author

of the amendment, and declared that

he had devised it in every part, and

with certain amendments, he proposed

to insist upon its adoption. As yet he

had not had time to prepare the

amendment because he was interested

evidently that he had other work to do

than to look after the canal bill.

Mr. Fairbanks offered an amendment

to the Spooner amendment authoriz-

ing the Secretary of the Treasury to

borrow from time to time \$40,000,000

for the construction of the canal, the

bonds to be issued for the amount bor-

OIL LANDS INVOLVED
IN LEGAL INQUIRY.

BY THE NEW ASSOCIATED PRESS—P.M.

WASHINGTON, June 12.—Argu-

ments were begun today in the

District Supreme Court in the

mandamus proceedings instituted by

the Riverside Oil Company and the

Cosmos Exploration Company, both of

California, to compel the Secretary of

the Interior to issue them patents for

lands alleged to be held by them under

the Lien Land Law. This law

permits persons having land in a for-

est land reserve to relinquish it and

take corresponding tract on other

land, vacant and open to settlement.

Counsel for the oil company argued

that by the mere fact of selection of

the land made by C. W. Clark, on

which the company's claims rest, no

jurisdiction in the Interior Depart-

ment to test the character of the

land, either in the oil or in the

timber, is given to the oil company.

Counsel for the government con-

ceded that the grant of a patent is

not to be believed in carrying out the

policy of the national platform, but

insisted that no convention had ever

indorsed the scheme proposed in this

case.

Mr. Tongue of Oregon followed in an

argument in support of the bill, the constitutionality of which he

declared could not be successfully

questioned.

Mr. Olmstead of Pennsylvania replied

to the remarks made by Mr. Cushman

of Washington, "good will" in

the sense that the Washington members

had been employed to delay the

construction of the canal.

With some heat, Mr. Fairbanks

insisted that his amendment was per-

fectly reasonable and proper, and

should be adopted with the

wise statesmanship to distribute the

cost of the canal over a period of years.

HOW THE TIMES TREATS LABOR.

THE LOS ANGELES TIMES pays to its skilled workmen wages that average from \$3.75 to \$4.50 per day for time work, and from \$4 to \$5 per day for piece work. These rates are higher than are paid by any competing newspaper. The Times pays larger sums weekly, monthly and yearly for labor than any journal in all the Southwest. Its cash disbursements on this account between August, 1890, and the end of September, 1901, aggregated \$6,007,000, and its annual expenditures for labor of all classes, both skilled and unskilled, now average more than \$175,000 per year. There never has been any attempt, in any quarter, to deny these specific and telling facts, and the proprietors challenge such denial if made. The Times has a more skillful, reliable and satisfactory force of workmen than any rival newspaper establishment; and not for years has it had any trouble with its workmen, who are independent of unions, loyal to their employers and to themselves, well satisfied and prosperous. The Times controls its own business in its own way, subject only to the laws of the land; and no interference with that control can be lawfully or justly made. The result of its fixed policy has proven highly beneficial to all concerned, and the justness and correctness of its course have for years past received public approval in most marked and conspicuous ways, the circulation and advertising patronage of the paper steadily and largely outstripping that of all local rivals.

THE TIMES-MIRROR COMPANY.

PRICES OF THE FIESTA-BIENNIAL NUMBER.

1 copy\$.10
3 copies\$.35
6 copies\$.60
12 copies\$ 1.00

The postage on this number when mailed by individuals to addresses in the United States, Mexico or Canada will be 4 cents per copy.

BUSINESS.

The clearances sent by the Los Angeles banks yesterday were unusually large, \$1,069,065.67. A large check sent by a railroad, probably part payment on oil property purchased some weeks ago, figured in the amount. For the corresponding day a year ago the clearances amounted to \$545,077.10, a normal figure for that time.

Wheat was bullish, and corn dull, while oats furnished the excitement of the day at Chicago. New York's stock market was torpid, and dealings fell of one-third.

RECIPROCITY'S SETBACK.

The revelations made before the Senate committee which is investigating the Cuban reciprocity question are not such as will be likely to help the chances of the proposed reciprocity measure. The testimony of F. B. Thurber, putative President of the "United States Export Association," showed, as the dispatches have related, that a sum between \$3000 and \$9000 was paid to him out of the treasury of the military government in Cuba, to be used for the purpose of influencing public sentiment in the United States in favor of Cuban reciprocity. The fact that this money was disbursed for the purpose named, with the full sanction of Military Governor Leonard Wood, places that gentleman in a peculiar position, which makes some explanation from him imperative. It is not claimed that the money was used in a criminal way, to corrupt Congressmen or other officials, but that it was used, together with a large sum contributed by the sugar trust, for the purpose of conducting "a campaign of education" in the United States in favor of granting to Cuba the alleged "relief" demanded by the advocates of reciprocity.

Gen. Wood will doubtless demand a full investigation of the matter. It seems likely that the investigation, which is almost certain to be made, whether he demands it or not, will traverse the whole subject of the disbursements of Cuban money under Gen. Wood's stewardship. Mr. Thurber's testimony, supported as it is by receipts showing when and in what amounts the money was paid, puts the matter in such a light that nothing save a full and fair investigation will be satisfactory. This, Gen. Wood will doubtless court, for it is not to be believed that he has been or would consent to be a party to any corrupt or wrongful use of money, of which he was the custodian. It will very likely appear, in the end, that the use of Cuban moneys for the distribution of reciprocity literature was upon the advice and with the concurrence of prominent Cubans, who regarded such use as entirely legitimate. That it was so seems hardly demonstrable. But all persons accused or implicated are entitled to their "day in court."

It cannot be regarded otherwise than extremely unfortunate that the name of Gen. Wood has been linked so closely with that of the sugar trust in this matter. It is becoming more and more apparent that the inspiration and backing of the movement for Cuban reciprocity come principally from the sugar trust, although there are many persons, in Congress and out of it, who thoroughly and conscientiously believe in the wisdom and expediency of that policy. The President is among this number. No one will question, for a moment, his sincerity and conscientiousness in this matter. But if it be made to appear conclusively that the

among the troops of a great nation. A thorough investigation and overhauling of the United States militia system, from top to bottom, could do no harm, and there is every indication that it might accomplish much good.

RIGHT OUTLOOK FOR OIL.

An intimation of vast importance to the oil industry of California was contained in a special dispatch to The Times from Washington, published a short time ago. Our Washington correspondent said it is possible that the United States navy may soon become the greatest consumer of oil in the country, and that steps are about to be taken by the navy to determine whether or not California and Texas oil can be made into good fuel for marine purposes. The House Republicans put into the Naval Appropriation Bill an item of \$20,000 for experimental work to ascertain whether oil can be adapted to naval work. The Senate committee struck the appropriation out, without hearing the merits of the case, but it reconsidered its former action, and the item will stand in the bill.

It goes without saying that, should the United States government adopt oil for its war vessels, this would induce many owners of merchant ships to thoroughly investigate the subject, and probably to follow the lead of Uncle Sam.

Unless we are very much mistaken, within five years, or perhaps even a shorter time, we shall not be discussing the question of an outlet for our surplus oil, but shall be asking where, on this Coast, a sufficient supply is to be obtained. The days of 50-cent oil are surely numbered.

IRRIGATION AND THE ORIENT.

A copy has been received of remarks by William M. Bunker, special commissioner of the San Francisco Chamber of Commerce, before the Committee on Irrigation of the House of Representatives. This striking presentation of a great issue will shortly appear as a public document. As commissioner of the Chamber of Commerce of San Francisco, Mr. Bunker studied the trade conditions of the Orient, inspected the farming lands of Eastern Siberia, followed the Trans-Siberian Railway route from Vladivostok to St. Petersburg, and learned the probable influence of that 6600 miles of railway on Pacific Coast trade and products.

The local bank which has opened a "ladies' department" with two windows down the center has now some 150 members of opening and some love will be well served. Thus for the tunnel will be a good deal of an sore instead of the good thing that was promised when the work on it was commenced. Let there be light; also asphaltum, where it will do good, and assist in preserving the peace of nations.

The Times is in receipt of an invitation to attend a "house warming" to be given by its valued contemporary, the New York Press, on the occasion of the opening of its new building, tomorrow afternoon. The time is just a little too short to make the trip without danger of being late. But The Times will be with its contemporary in spirit, at least. The Press is one of the best of the New York papers, and amply deserves its splendid success.

FRIDAY, JUNE 13, 1902.

EVENTS IN SOCIETY.

"Some people are like blotters; they receive many good impressions but derive no benefit therefrom."

PERSONAL.

has exercised these powers but for more than a year. It is still exercising them, and is not presumed to withdraw the protection of our flag from territories under our sovereignty.—Ed.

John W. Gay, Jr., of San Fran-

cisco, Judge George E. Otis of

the Van Nuys.

J. W. Hanson, a mine owner in

the Vina Napa.

John M. Harbour and wife, of

Iowa, are visiting in the city.

J. L. Hart, a Winslow, Minn.,

man, is staying at the Hotel

O. L. Street, United States

attorney at San Francisco, Mr.

Nadeau.

C. L. Fisher and W. R. Am-

lebeck, mining men of Mexico, are at

Los Angeles.

J. E. Ward and E. D. Black-

registered at the Westminster

England.

Nathan W. Blanchard, the

Paul, capitalist, is registered

at the Van Nuys.

W. H. Sneedeker, a San Fran-

cisco railroad official, is with

his wife.

A. F. MacFarland and wife,

Frances, are sojourning at

Navy Brook.

W. P. Thompson of El Paso

and his bride (née Dryden) have

arrived at the Van Nuys.

R. B. McCrillis, A. Rose

and J. M. Devine of Tucson,

Ariz., are staying at the Van Nuys.

Mrs. J. E. Abbott, art

with the remains of her husband,

A. L. Pettigrew, son of U. S.

Senator Pettigrew, is registered

Eisenbeck from Sioux Falls,

S. D., and R. W. Taylor of Redwood

proprietors, are guests at the

George A. Lonsberry.

Large mining interests at West

Ariz., are at the Westminster

and are looking over his mining

interests.

President Benjamin M. Whalen

of the University of California,

is at the Van Nuys.

Dr. J. E. Lovell, who per-

formed the marriage rites, assisted

by Rev. D. J. Wood, pastor of the Boyle

Hill E. Church.

The church was transformed under

the skillful direction of Mrs. F. O.

Lehman, white and green, heightened

by a touch of brighter color on either

side, dove, mounted in front of

the altar, was the ring used

in the marriage service. On the right

of the altar, the woman who

was a graduate of the G.C.A., of which the bride

is a member.

Dr. Lovell acted as maid

of honor; Miss Minnie Rees and Miss

Ethel Schreiber were bridesmaids. M.

A. Palen stood with the groom,

and Miss Little Syden, Miss Ethel

and Mrs. Wm. C. Clegg and Charlie

Adams were the bride's

maids of honor. The bride's

dress was of dainty white chiffon, over

blue silk, with a belt of white satin ribbon.

The bride's veil was the ring used

in the marriage service. The

little flower girl, Frances Gillan, was

in white. A musical programme was

provided by Miss Vesta Knox, Prof.

A. J. Smith, and F. O. Glaser, William

Goodwin, and William Goss.

The Lehman "Wedding March" pre-

sented the ceremony, and Mendelsohn's

"Wedding March" was played as the

processional.

Promises were exchanged, the cera-

mony was a large gathering, the church

the ceremony being followed

by a supper at the home of Mrs.

M. A. Palen, where only immediate friends

and family were invited.

Dr. and Mrs. Lovell will be at home

for the present at No. 221 East Second

Street, after a brief wedding trip.

Progressive Whist.

There's no need of it. I'll guarantee a per-

fect correction. Every pair of glasses I

sell has a two-year written guarantee.

J. P. DELANY, EXPERT OPTICIAN,

305 S. Spring St.

and friends of the Institute of the cadets

from the Los Angeles Military Acad-

emy were also present with Prof.

Smith. Games and music were parti-

cipated in. Refreshments were served.

Gifts and wishes were answered.

Miss Anna, and a highly enjoyable

time had by all.

Campbell-Sargent.

Last evening at 8 o'clock at the Vin-

cent W. E. parsonage, No. 150 West

Thirty-first Street. Beautiful prizes were

awarded. The capital prizes were

awarded to Mrs. Klaus, while Mrs.

Martin and Mr. French were winners

of the consolation prizes. After the award

of prizes refreshments were served.

Those invited were Dr. and Mrs. J. W.

Kistner, Mr. and Mrs. Charles Hutchison,

Mr. and Mrs. C. F. Taggart,

Mr. and Mrs. A. W. Kinney,

Mr. and Mrs. W. B. Budd, Mr. and Mrs. A.

W. H. Knobell, Dr. and Mrs. A.

W. H. Pinner, Dr. and Mrs. H. J. Nance,

Dr. W. Hill, Judge and Mrs. Waldo

W. V. Judge and Mrs. D. F. Waldo

and Mrs. Charles Morgan, Mr.

Mr. Leon P. Moss, Mr. and Mrs.

Joseph Chambers, Mr. and Mrs. Frank Taylor,

Mr. and Mrs. A. W. Randall, Prof. and

Mrs. C. S. Klaus, Mr. and Mrs. G.

Frederick, Mr. and Mrs. W. Mar-

ton, Mr. and Mrs. Thomas Pasey, Mr.

Mr. and Mrs. Fred Zecker, Mr. and Mrs.

Charles Blake, Mr. and Mrs. E. T.

Parks, Mr. and Mrs. James Shultz,

Mr. and Mrs. J. Beck, Mr. and Mrs. F.

Perry, Mr. and Mrs. Charles Hutchison, Mr.

E. Eichholz, Dr. Follansbee, Dr. R. W.

F. W. Eichholz.

Mr. Frank Eckley of West Twenty-

second Street catered the Floradora

Club Wednesday evening.

Miss Maud of San Francisco,

the prettiest home was re-

markably attractive by

the arrangement that in graceful

order to enter the parlors, and by

the red carpet that, combined

THE WEATHER.

COMPARATIVE TEMPERATURES.

	Max.	Min.	Max.	Min.	Max.	Min.
New York	62	42	New York	54	32	26
Pittsburgh	62	42	Cincinnati	54	32	26
St. Louis	62	42	St. Paul	70	42	32
Los Angeles	55	32	San Fran. City	62	42	26
			Jacksonville	55	32	26

The maximum is for June 11; the minimum for June 12. The mean is the average temperature for the two days.

Yesterday's Report and Forecast.

U. S. WEATHER SERVICE, Los Angeles, June 12.—Reported by George E. French, Local Forecast Official. At 5 o'clock a.m. the barometer registered 29.81; at 5 p.m. 29.72. Thermometer for the corresponding hours showed 85° and 70°; at 5 p.m. 70°. The northeast wind, 8 p.m., 6 per cent. Wind 8-10 m.p.h. Northeast velocity 3 miles; 1 p.m. west velocity 8 miles. Maximum temperature, 76°; minimum, 56°. Barometer reduced to sea level.

Weather Conditions.—The depression continues in the Colorado Valley, with its axis extending across the California valleys. Cloudy, unsettled weather, with rain, over the Coast. A sprinkling rain fell at Los Angeles and a thunderstorm occurred at Independence. The Colorado River, the Colorado Plateau and New Mexico. Cool weather continues on the North Pacific Slope and on the California Coast. Warm days prevail in the valleys, particularly in the San Joaquin and Sacramento areas. Generally cloudy tonight and Friday, probably misting for tonight.

SAN FRANCISCO.—June 12.—Weather conditions continue to improve. The cool, damp, cloudy weather prevails over the North Pacific Slope, the Rocky Mountain region and along the California coast. In other districts it is clear. The temperature has risen in the Colorado and a depression over the plateau portion. The temperature has risen in Southern Utah. In other districts the chances have been slight, to a maximum of 10 per cent, at Salt Lake City. High westerly winds are reported along the California coast and in Nevada.

For Northern California: Partly cloudy Friday; cooler in the interior; brisk to high westerly wind.

Southern California: Partly cloudy Friday; with fog in the morning and at night; brisk to high westerly wind.

WEATHER CONDITIONS.—Chico: Chicks picking finished; fair crop. Hollister: Much for no change in crop prospects. Modesto: Walnuts promise heavy crop; soft-shelled oranges.

Stanford: Antioch: large; peaches doing well; very good crop; pastures good.

Concord: Large; peaches; barley crop turning out well; good quality; fruit doing well; antioch jas market.

San Jose: Fruit crop doing excellent; orange trees in blossom; peaches; good; lavender. Continued favorable weather for crops; prospects unchanged.

Barry: Harvest turning out better than expected.

Napa: All crops about the same.

Chico: Favorable weather for all fruit.

Redding: Barley being harvested.

Newman: Wheat harvesting to commence soon; weather favorable.

Stockton: Blackberries ripening; immense crop.

Palermo: Grapes setting well.

Santa Rosa: Grapes promising as to quality and quantity.

Tide Table.—For San Pedro:

THE LAND.

Orchard, Farm, Garden, Rancho and Stockyard.

[A. W. JEFFREY, AGRICULTURAL EDITOR.]

NOTES AFIELD.

Year Book 1901.
THOSE farmers who really want the new annual should apply for it at once. Arrangements have been made by the Horticultural Commission for securing a large number of these year books for distribution, and the books, if received, will be handed out in the order of the applications. Last year 150 copies were distributed from a list of those who thought enough of the work to send in names. This number does not interfere with those who have been sending their annuals direct from their representatives. I hope our plan will not fail this year, as the book is of particular value.

A Famous Flower.
What would be more enjoyable than to go afield far enough to see the most wonderful of the flowers of this Coast. I have now in my possession a great bunch of these beauties, and they present an attractive picture in a vase, with their large snow-white petals and center of lemon yellow stamens. This flower has a delightful odor, resembling, when not too close, that of the lily of the valley. The Matilija poppy must be in full bloom in its most noted haunts in Ventura county, or those scarcely less celebrated in Riverside county.

Something New.
Olive growers will be pleased to know that a thorough test is to be made of the new South African parasite of the black scale, said to keep this king of pests in complete subjugation about Cape Town. W. E. Hughes is receiving a consignment of this insect from Alexander Craw, the State entomologist, and will set aside a large block of olive trees in his orchard this side of Howard Sunbeam, or the whole orchard, if necessary. Mr. Hughes agrees to liberate the bugs and keep out the sprayers and fungicides until the best results. Mr. Craw has only sent out a large colony of these scale eaters, but promises to follow with a new lot as often as necessary. It will soon be time for the State quarantine officer's annual visit to Southern California, and the horticulturists are preparing to give him a warm welcome. It is hoped the Hughes experiment will demonstrate that there is a sufficient tendency to populate the orchards and exterminate the black pests.

Fight to the Finish.
The San Francisco and Sacramento press is full of the fight between the commission men of the greater city and the fruit growers of the Sacramento Valley. The latter have been dissatisfied for some time past with the treatment they allege to be unfair. To make matters worse, the commission men raised the rates on the growers this season. The growers then organized, rented a large saleroom in San Francisco, applied for membership in the city organization to which the commission men belong, promising to abide by all the local rules for selling fruit, and expected to open up business without friction or delay. Not so, however, for the growers were denied membership and are now being boycotted, refused sharp privileges and tabooed generally by the commission dealers. It will now be in order for the latter to employ sandwich men to parade in front of the fruit growers' store, declaring the farmers "unfair" and advising honest people to have nothing to do with the new arrivals. Salter & Co. have had to endure one of these battles parading the length of their frontage for eighteen months. He has a trail worn in the curbing, and hasn't broken up the trade of the firm in all these weary days of tramping.

The Lungs of the Tree.
I learn from Frank Scoville of Corona that the black scale is becoming a serious menace to the groves at Corona, and from another source that the horticultural commissioners of Riverside county are alarmed at the invasion and are preparing to meet it all along the line. It has been held that from the dryness of the air and the warm weather this scale could do more damage than the black scale of that county, and that no doubt will be the case if the present infection is stamped out and the seasons resume their normal tendencies. Reports from all over Los Angeles county show that this season has been remarkably favorable for the multiplication of this, the most serious pest of the orchardist, to meet. The effects of these conditions are felt in every county and, and no doubt arises from the commission men together with the unusual moisture in the air that has prevailed for so many months.

In this connection it may be of interest that all the horticultural inspectors of Los Angeles county have been ordered to canvas each district, examine the present condition of agriculture, and to gather from the farmers their opinions upon the earliest time the pest may be attacked with success this summer and transmit the information to the commissioners' office from which a synopsis of the matter will be made for the benefit of the growers. This report should be ready at one time probably so near together that the flight of a wild bird might have carried it that distance.

Trail of the Sprayer.
Three or four of the fruit growers at Altadena are very much disconcerted over the damage sustained by their orchards from the use of distilled water. The application was made last April, a new process for mixing the oil and water being used. In the orchard of Mr. Vierbeck the havoc is great. Before the application this orchard was one of the most productive and largest of the Altadena orchards. Now many of the trees are ruined and some have practically died. Great limbs have been killed back to the trunk and dozens will never be pretty to look upon again. This season's crop is ruined on half the orchard and the trees cannot rally in time to produce a crop in 1903.

It seems useless to warn the users of distilled water to experiment with every oil and water brought out, such as mechanically mixing the distilled water after they are put into the spraying tank. In the case of Mr. Vierbeck's orchard some of the trees received a full blast of undiluted oil, because, perchance, the agitator didn't work just right. Other trees did not get any oil, or at least, not enough to destroy the infection. Why not let those who can pay the extra cost and money to experiment with new insecticides and appliances prove the efficacy of remedies before sacrificing an orchard or a crop at best, by "propecting" with doses of different kinds and their manner of commixture? The loss from experimentation has been frightful during the last year, and in this case has a general use of distilled water, except, perhaps, at Rivers, where the trees are so large and so interlocked that no other remedy is possible. At Rivers, even, the cyanide treatment will be used largely the coming campaign.

Hoppers at Warner's.
The following interesting item, taken from the San Diego Tribune, describes the methods of fighting locusts at Warner's ranch. Our Prof. Woodworth, who has been called north to engage in a similar warfare at Fresno and other places, has no Indians with which to stay the invasion. This is the Indian method:

"For two weeks grasshoppers have been hatching very fast. They infest the superintendence of Mr. Taylor, the superintendent of the ranch, has for ten days had an army of swarms fighting the as yet wingless pests. With sticks or brush they drive them into little holes they have dug in the ground. It is a simple process, where they suck them and carry them to another ditch filled with burning straw, where they are cremated.

"The grasshoppers start in on one plant, and then the destroyers start at the same place and keep pace with them. In that way Mr. Taylor saves most of the grass."

Late Census Bulletin.
The Times has just received the census bulletin relating to agriculture in California. A "farm," as defined by the Twelfth Census, includes all the land, under one management, used for raising crops and pasturing live stock, with the wood lots, swamps, meadows, etc., connected therewith. It includes also the house in which the farmer resides, and all other buildings used by him in connection with his farming operations. From these records the following interesting statistics are taken:

Number of farms in California.....	72,042
Value of farms, including improvements.....	\$1,021,510,000
Value of land and other improvements.....	848,000,000
Value of implements and machinery.....	62,511,570
Livestock.....	67,500,000

By adding the last two items to the value of "farms" it gives the total value of the farm property, \$1,021,510,000. The products derived from animal, poultry and birds, including animals sold and animals slaughtered on farms, are referred to in this bulletin as "animal products." The total value of all such products, together with the value of farm products, is \$1,084,000,000.

The value of "farm products," or the "gross farm income," is obtained by deducting from the total value of farm products the value of the products fed to live stock on the farms. The value of crops, including forest products cut and produced on farms, the value of farm products for 1899 exceeds that reported for 1898 by \$44,000.

The value of "farm products," or the "gross farm income," is obtained by deducting from the total value of farm products the value of the products fed to live stock on the farms. [NEWS REPORTS FROM TIMES CORRESPONDENTS.]

POOR PERRIS RANCHERS
WILL LOSE LAND.JUDGE WELLBORN'S DECISION OF
FAR-REACHING EFFECT.

Many Farmers Will Be Unable to Pay Assessments and Property Will Revert to Bondholders--Wertz Jury Disagrees--Riverside Brevities.

RIVERSIDE, June 12--The decision rendered yesterday by Judge Wellborn of the United States Circuit Court in Los Angeles issuing a pre-emptory writ of mandate to compel the Supervisors of Riverside county to make an assessment upon the Perris Irrigation Company to pay \$32,000.75 is of importance to owners of land in the Perris Valley, whose lands were bonded when the Perris Irrigation District was formed. Judgment in the sum named was rendered in the Superior Court, March 28, 1901, in favor of D. H. Thompson. The Supervisors demurred in making the levy, and the decision rendered yesterday was in reply. For years the district has neglected to pay interest on its bonds. In 1901 R. H. Thompson, one of the bondholders, brought suit against the district and obtained judgment for the amount due for interest on bond coupons held by him. The trustees of the district failed to levy any assessment to pay the amount. This put the matter up to the Supervisors, who refused to act on several grounds. Mandamus proceedings were then instituted in Judge Wellborn's court. As a result of the decision many of the farmers will be unable to pay the tax and the land will revert to the bondholders. Other innocent purchasers of bonds will probably sue the district to recover unpaid interest, and the effect of the decision will be far-reaching.

RIVERSIDE BREVITIES.

After being out all day the jury in the case of the people against a man named Wertz, charged with unlawfully assaulting a weak-minded woman, found it impossible to agree upon a verdict, and was discharged. Nine stood for conviction and three for acquittal. The case was adjourned.

The golf tournament for the championship of Riverside the match played yesterday at the Rubidoux links between Hause and Whipple resulted in a tie for the first and 3 to play. It was one of the most brilliant and hotly-contested matches ever witnessed on the local links.

A well-attended meeting of the Riverside Prohibition Alliance was held yesterday at the home of Mr. and Mrs. L. C. Waldman. Six new members were admitted. An entertainment musical and literary program was rendered.

The University Extension Course Association has elected S. H. Herrick, president; W. A. Correll, vice-president; Mrs. Stella A. Atwood, secretary, and C. E. John, treasurer.

Mrs. Anna Rice tendered a surprise party yesterday afternoon and evening to her parents, Mr. and Mrs. F. Rice, on the occasion of their twenty-fifth wedding anniversary.

William Barker pleaded not guilty in the Superior Court yesterday on a charge of assault with a pistol. The trial was set for June 23, and a venue of twenty-five ordered.

Mrs. S. H. Herrick, assisted by her daughter, Mrs. J. Lansing Lane of

China, entertained yesterday afternoon at her home on Fourteenth street.

Mrs. Laura A. Flick, formerly of Riverside, died yesterday at Highland. The funeral was held here this afternoon.

W. S. Kennedy and family left to-day for Coronado.

REDLANDS.

MUNICIPAL OWNERSHIP.

REDLANDS, June 12--The question of municipal ownership of a lighting plant is being agitated in this city. At the last meeting of the Board of Trustees, when bids for lighting were opened, Trustee Mervine started the ball rolling by declaring that the price asked by the only bidder was exorbitant. He further remarked that the sooner the city takes steps for acquiring the municipal plant, the better. The other members of the board seemed to coincide with his views. The matter went over for further investigation.

REDLANDS BREVITIES.

Among the many matters passed upon by the City Trustees last evening were the following: The name of Water street was ordered changed to Central avenue; a policeman was appointed to protect Prospect Hill Park from being damaged by visitors who have been tearing up valuable plants and vines; an ordinance was ordered drafted to prevent the small boy from shooting giant "decoys" on the glorious Fourth; a sewer was to be dug on the city streets; the report on the question as to whether the smoke of the gas plant is a nuisance was made, but was incomplete and the committee was discontinued; additional electric lights were ordered for various streets; the question of closing tamale wagons at midnight was also thoroughly discussed.

Redlands Woodmen of the World will turn out two hundred strong for the big demonstration at San Bernardino next Saturday. It promises to be the biggest thing of the kind ever attempted in this neck of the woods. The Redlands delegation will have second place in the street pageant.

Mr. W. C. Hause, a well-known business man of Redlands, has been engaged to lecture on the subject of the formation of a handsome library building at the corner of West State and Fourth streets. It will be of pressed brick and promise to be one of the finest structures in the city. It has already been leased.

The Redlands girls have been working strenuously for their quarters. On the ground floor will be stores.

NOT RESPONSIBLE.

After being out all night the jury in the case of Charles Larson, charged with selling liquor to Indians, rendered a verdict of guilty and three for acquittal. Larson was sentenced to the trial calendar. Wertz is out on bail.
